

# Powering a Greener Digital Future

The Green Standard in Sustainable Cloud Computing

## Be #GreenWithAkamai

At Akamai, we distinguish ourselves from traditional cloud providers through a robust commitment to sustainability and by integrating a comprehensive set of environmentally focused initiatives. Akamai's approach extends beyond mere compliance, positioning us as a leader in sustainable cloud services and a choice partner for those who prioritize sustainable cloud computing.

**Our Sustainability Mission:** *Harnessing the power of our global platform to create a sustainable and equitable future for the world.*

## The Akamai Advantage

### Unparalleled insights

- **Data:** Akamai provides you with the insights you need through our Carbon Calculator and customized emissions reporting — we take the guesswork out of your cloud emissions footprint.

### Net-zero emissions

- **Goal:** To achieve net-zero emissions across our global platform and operations by 2030.
- **Scope:** Includes Scope 1, 2, and relevant Scope 3 emissions.
- **Approach:** Focusing on direct emissions reductions rather than reliance purely on offsets.

### 100% renewable energy

- **Straight-forward Strategy:** Bringing additionality to the Grid, not purely based on credits or offsets. Akamai is tying its energy use directly to the generation of clean power.

### Energy Efficiency

- **Data Center PUE:** Akamai's data centers achieve an average Power Usage Effectiveness (PUE) of 1.4.
- **Innovation:** We incorporate the latest technologies, reducing energy consumption while not sacrificing performance.

### Circular Economy & E-Waste

- **E-Waste Recycling:** 100% of Akamai's e-waste is recycled according to e-Stewards Standards.
- **Lifecycle Management:** Maximizing hardware reuse and minimizing environmental impact.

### Emissions First

- **Impact:** Cofounded the Emissions First Partnership to reduce emissions at the source.
- **Strategy:** Prioritizing real-world carbon impact over renewable energy credit purchases.

## The Green Choice is Akamai

- **ISO Standards:** Our platform is the only cloud with a blanket ISO 14001 attestation.
- **Integrated:** Environmental responsibility is built into every aspect of Akamai's operations.
- **Transparency:** Regular and transparent reporting on progress toward sustainability goals.
- **Impact:** Focused on real-world decarbonization, not greenwashing.

Our global platform offers a superior, sustainable choice for businesses. By integrating sustainability measures into its operations, Akamai meets and exceeds industry standards, making it the best option for companies serious about reducing their environmental footprint.
